

**Information Technology Industry Council
FCC Filings 2002**

Proceeding	Filer	Filings	Issues Addressed	Status
<u>Unbundling (UNE)</u> Review of the Section 251 Unbundling Obligations of ILECs	HTBC	Comments	http://www.itic.org/policy/fcc_htbc0204.pdf <ul style="list-style-type: none"> FCC should refrain from imposing Section 251 unbundling obligations on fiber, remote terminals, and DSL (and successor) electronics deployed on the customer side of the central office used to provide broadband services Refraining from the imposition of unbundling for new, last-mile broadband infrastructure will promote ILEC deployment of broadband infrastructure FCC must continue to require ILECs to provide collocation space and unbundled access to their legacy copper facilities FCC should develop deployment and bandwidth benchmarks 	<i>Filed:</i> April 5, 2002
	HTBC	Reply Comments	http://www.itic.org/policy/htbc_020717.pdf <ul style="list-style-type: none"> Supporting HTBC and Corning comments 	<i>Filed:</i> July 17, 2002
	ITI	Reply Comments	http://www.itic.org/policy/fcc_020717.pdf <ul style="list-style-type: none"> Supporting HTBC and Corning comments 	<i>Filed:</i> July 17, 2002
<u>Cable</u> Appropriate Regulatory Treatment for Broadband Access to the Internet over Cable Facilities	HTBC	Comments	http://www.itic.org/policy/fcc_020618.pdf <ul style="list-style-type: none"> Cable modem service is an information service should be subject to minimal regulation FCC should monitor market developments to ensure consumer choice and should protect "connectivity principles" Cable service providers should be allowed to use pricing to allocate network bandwidth, but should not otherwise restrict consumers' use FCC should monitor provider conduct and take action when appropriate 	<i>Filed:</i> June 17, 2002
<u>Wireline</u> Appropriate Framework for Broadband Access to the Internet over Wireline Facilities	HTBC	Reply Comments	http://www.itic.org/policy/htbc_020701.pdf <ul style="list-style-type: none"> Wireline broadband internet access service is an information service and should be subject to minimal regulation FCC should maintain its policy that requires ILECs who provide affiliated ISPs with a broadband transmission service to make the same transmission service available to unaffiliated ISPs on a non-discriminatory basis FCC should monitor the market for wireline broadband to ensure consumer choice 	<i>Filed:</i> July 1, 2002
<u>Wireless</u> Spectrum Policy Task Force	ITI	Comments	http://www.itic.org/policy/fcc_020708.pdf <ul style="list-style-type: none"> Principles to improve spectrum management Spectrum in the 1700Mhz band should be converted for 3G usage in a timely manner FCC should seek to identify additional unlicensed spectrum and create rules of the road for efficient usage to that spectrum 	<i>Filed:</i> July 8, 2002
